## A FEW SPECIALTIES OF GREAT MERIT.

We have only a few of these.

**Imperial Yellow Gage Plum**—Extra fine flavor and very productive. Each, 75c.

**Pacific Prune**—Nearly black, very hardy and productive. Each, 75c.

**Missouri Blackberry**—We have secured a few thousand of these, and will say for them that they are a great acquisition to the berry grower. It has been impossible to get plants of them until this season, so great has been the demand for them in the locality in which they are grown. Dwarf, with slender vines, easily covered and handled, and bears an intensely black berry of fine quality. We believe that Early King for first crop, followed by Missouri, will prove the most profitable of any berry you can plant. Each, 10c; 10 for \$1.25; 100 for \$5.00.

## EARLY KING BLACKBERRY.

The most profitable blackberry for early. Canes slender, berries large and fine, and being ten days ahead of the main crop you get the top price. Easily laid down, and a splendid all around berry. Each, 10c; 10, 75c; 100, \$5.00.

## ROOT GRAFTS.

We're prepared to put them up to order, but do not care to make less than 100 of a sort. If you have a valuable tree from which you wish to propagate, send us the scions and we will make them into root grafts for you. Our work is first class. No children employed—none but old experienced hands. 100, \$1.00; 500, \$3.50; 1,000, \$6.00.
